## E2E Service Orchestration & Automation

### At a Glance

Inmanta Service Orchestrator empowers Telecom Operators and Service Providers to speed up service delivery and reduce the total cost of ownership through efficient, end-to-end automation. No longer is automation limited to silos and vendor-specific solutions – you can now integrate with various domains and best-in-class components from any vendor

### About

- Incorporated in 2016
- HQ in Leuven, Belgium, Sales UK and Germany
- Truly intent-based
- Purpose build (based on 15 years of R&D)
- State engine, dependencies aware
- Dynamic, self-healing, active adapters with integrated loop

### Strategic Value

- Orchestrator retaining value within the Operator
- Vendor agnostic (avoid lock-in)
- Integrated supply chain automation
- From DIY up to complete DFY
- Future proof – adaptable and extendable

### Business Value

- On demand and self service
- Order to cash > within minutes
- Northbound API (B2B & wholesale)

### Next Generation NaaS

- Lean deployment- reduce project risk
- New Business > new services in weeks
- Reusable revalidated software
- Release testing time reduced by 98%
- Reduce OPEX by at least 50%
- Service assurance by design

### Made to measure

- Supports legacy, hybrid and cloud-native architectures
- Top > down. Multi-domain and multi-layer
- Open APIs & framework (N, S, E, W )
- Compliant with TMF, MEF LSO & ETSI ZSM

### Service Integrity and assurance

- Native CI/CD & DevOps support
- Comprehensive 100% service test automation
- Pre-production modelling (Digital Twin)
- Release integrity assurance

# Order to cash from 3 months to 3 minutes

**Automate E2E services in months instead of years**

**Achieve with 5 FTEs where others need 100**

**Save 90% on change requests**
